Future-proof, for you and for the planet
Paving the way for a greener tomorrow

► At IVC Group, we truly believe in products that are built with the future in mind.

► That’s why we take the time to pause and reflect on the impact of our entire strategy and operation.

► But we also realize that actions speak louder than words, so here’s how we raise the industry norm on sustainability, day after day.
Paving the way for a greener tomorrow

Through **resource conservation and waste reduction**, we minimize the environmental impact of our manufacturing and distribution operations.

Our **energy-efficient flooring plants** are among the **leanest and greenest** in their class, and to get our products to you, inland waterways are the logical choice. We invest in **clean-air technology** and **cutting-edge manufacturing methods** and use as many **recycled or renewable materials** as possible – think of eco-friendly inks and recycled PVC.

Additionally, IVC Group holds all suppliers accountable for ensuring that products are made in a **responsible manner** – one that respects both labour and environment.
